Create typical session log file	All	0%	20/03/2020	22/03/2020																												

We have created a Gantt chart in excel using a free editable template found on reddit. We had previously believed a Gantt chart was unsuitable for our programme and decided to use a simple calendar for scheduling work. But during stage 3 we realised this was an error, as there were a few cases of people doing the same work. To amend this we decided to create a simple gantt chart in which we would assign tasks and view their progress.
